CCTV & Security

Maxikyo provides CCTV and surveillance solutions that help customers monitor, protect and manage their premises with confidence. From camera selection to installation and maintenance, the focus is on creating reliable security coverage for homes, offices, factories, retail spaces and institutions.

Computers & Laptops

Maxikyo supplies desktops, laptops and essential IT hardware for daily business and personal use. Whether the requirement is for individual systems or workplace setup, the team helps customers choose practical, dependable technology that supports smooth everyday operations.

Wireless Networking

Maxikyo offers wireless networking solutions that keep spaces connected, stable and easy to manage. From routers and access points to office and building-wide connectivity, the service is planned around strong coverage, practical setup and ongoing support.

One partner.
Three essential systems.

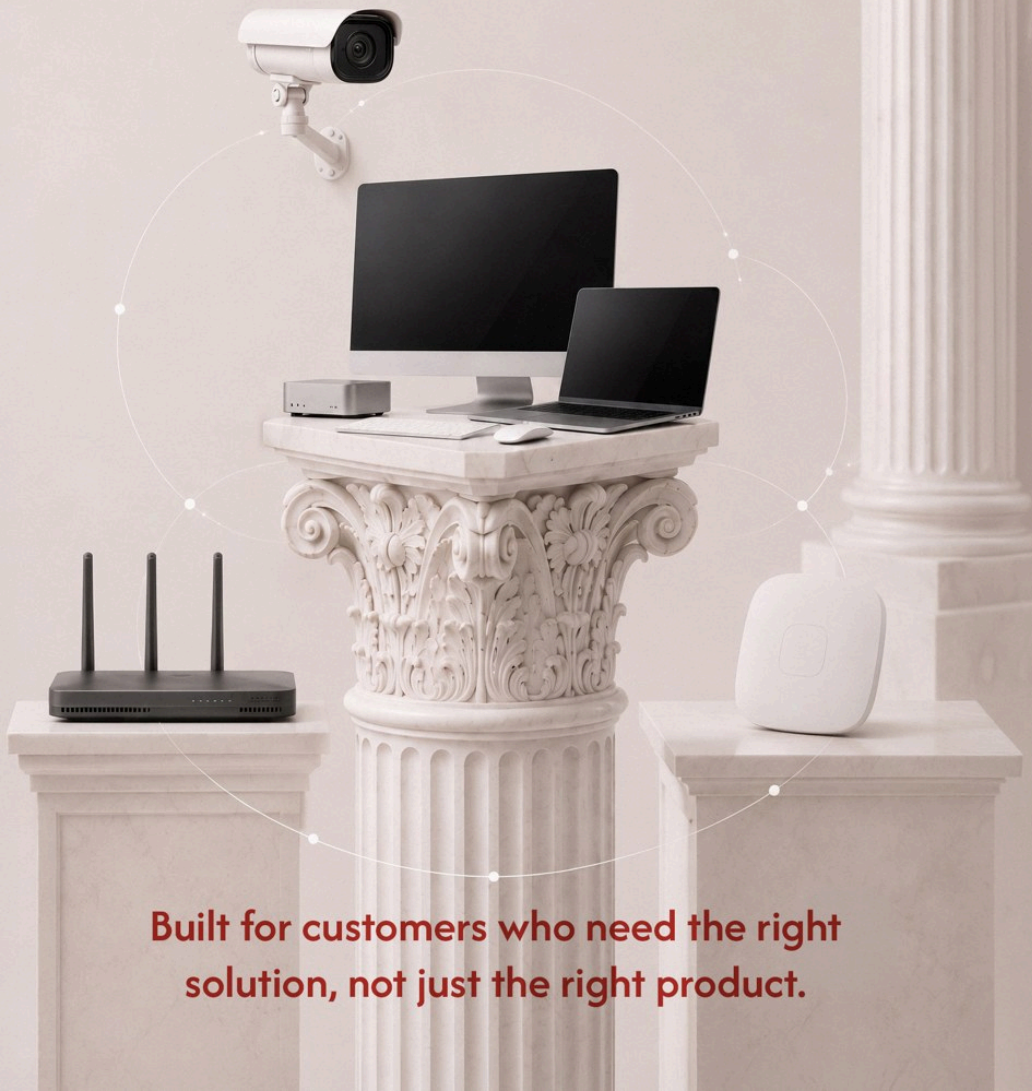

Maxikyo brings together security, IT hardware and wireless networking under one dependable technology partner. From protecting a site with CCTV to equipping teams with computers and keeping the premises connected, each system is planned to work smoothly in everyday operations.

when safety matters, we're always on

01. Direct supply advantage

With direct product access and strong supplier coordination, Maxikyo helps customers get the right technology with better pricing, faster availability and smoother execution. This makes the overall buying and project process more efficient.

02. Practical system guidance

Every site has different requirements, so Maxikyo recommends solutions based on real usage, coverage needs and budget. Instead of simply offering products from a catalogue, the team guides customers toward systems that make sense for their space.

03. Installation-focused approach

Maxikyo's work does not stop at product selection. The team helps customers move from choosing the right equipment to getting it installed, configured and ready for daily use, ensuring the solution works properly on site.

04. One point of contact

Customers can coordinate CCTV, computers, IT hardware and networking requirements through one trusted partner. This reduces confusion, saves time and makes the entire project easier to manage from start to finish.

05. Support after installation

Maxikyo provides service and maintenance support to help systems continue working smoothly after installation. With timely assistance and AMC options, customers can maintain performance, reliability and peace of mind.

Built for customers who need the right solution, not just the right product.

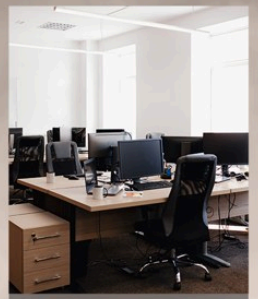

MAXIKYO

when safety matters, we're always on

Every space has a system. We make it work better.

Factories & warehouses

Offices & commercial spaces

Retail stores & showrooms

Solutions for every kind of premise.

Every site has a different requirement. A factory needs coverage and reliability. An office needs systems and connectivity. A residential society needs monitoring and support. Maxikyo works across different environments with practical, need-based technology solutions.

Homes & bungalows

Government public spaces

Residential societies

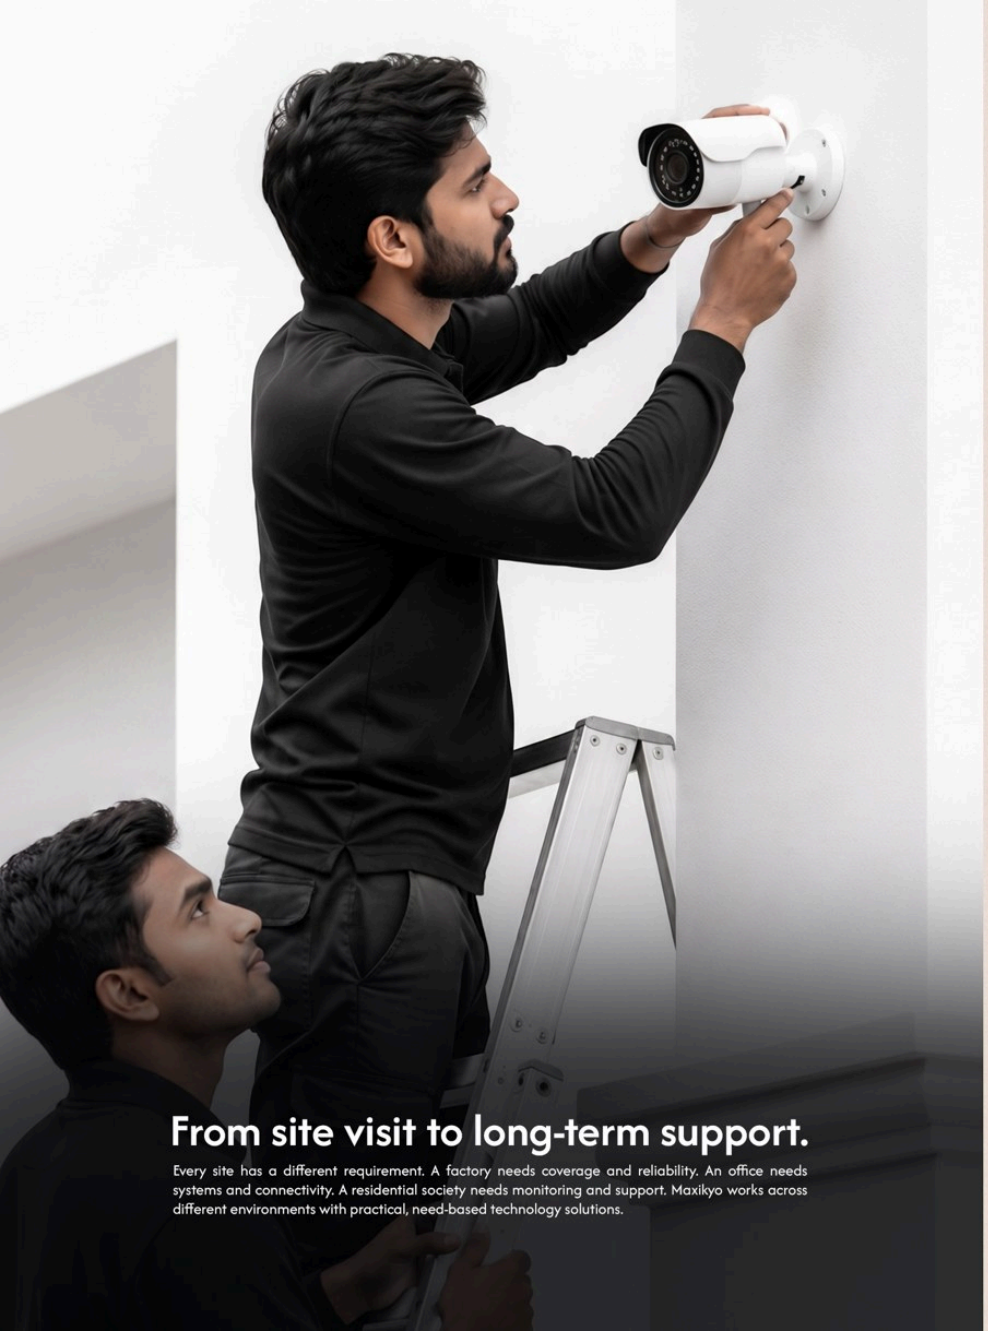

Schools & institutions

Hospitals & clinics

From site visit to long-term support.

Every site has a different requirement. A factory needs coverage and reliability. An office needs systems and connectivity. A residential society needs monitoring and support. Maxikyo works across different environments with practical, need-based technology solutions.

Understand the requirement

We study the site, usage, coverage needs and customer expectations.

Recommend the right system

The solution is planned with the right products, quantities and layout.

Supply & install

Products are supplied, installed and configured for practical use.

Test & handover

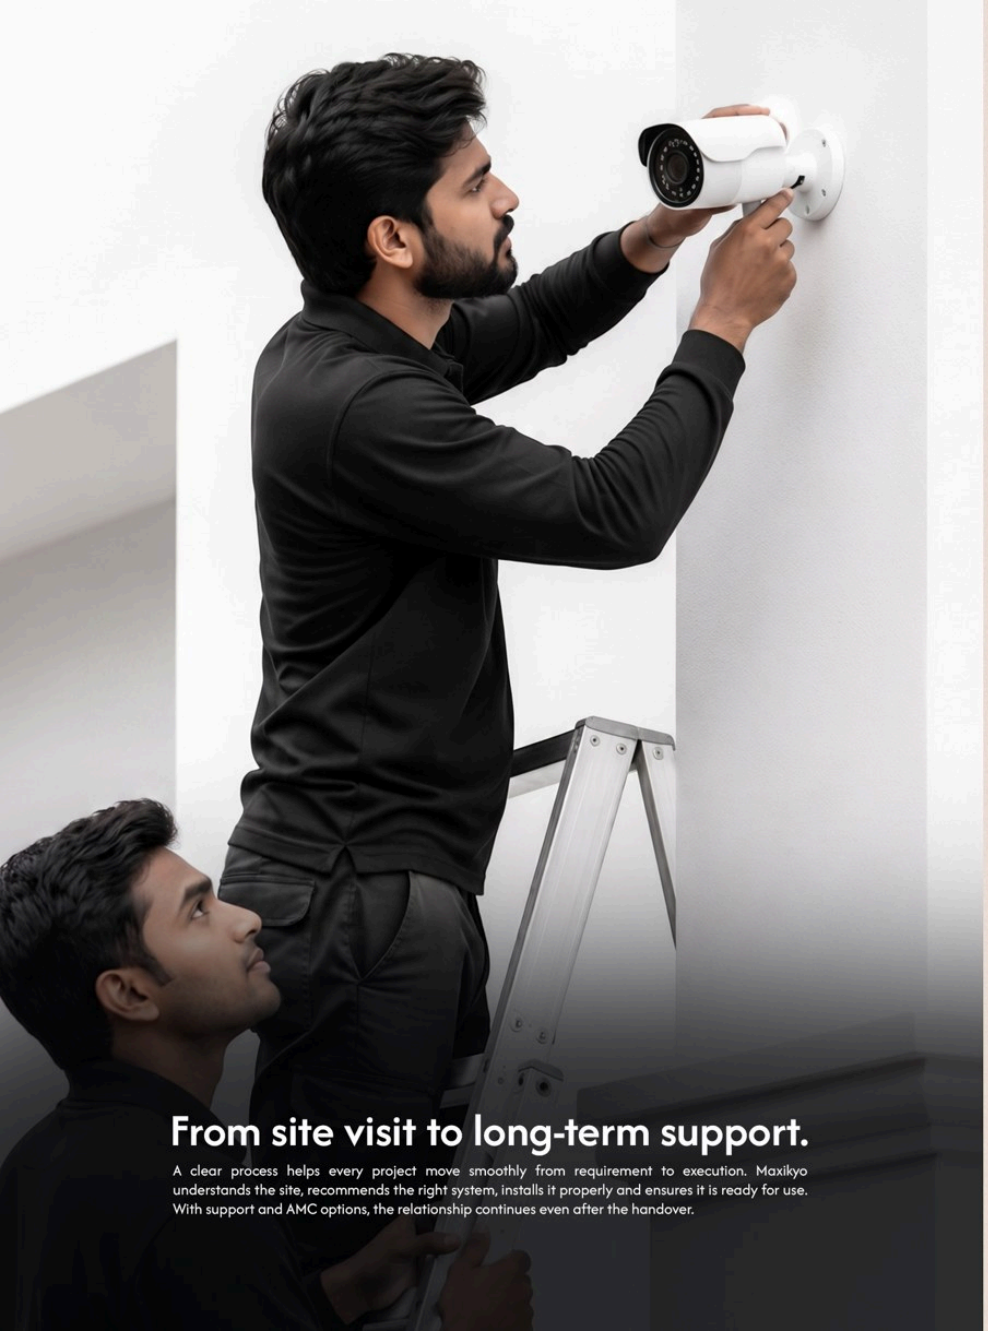

The system is checked, explained and handed over clearly.

Support & maintain

Ongoing support and AMC options help keep everything working.

MAXIKYO

when safety matters, we're always on

From site visit to long-term support.

A clear process helps every project move smoothly from requirement to execution. Maxikyo understands the site, recommends the right system, installs it properly and ensures it is ready for use. With support and AMC options, the relationship continues even after the handover.

Understand the requirement

Every project begins with understanding the customer's actual need.

Recommend the right system

Once the requirement is clear, the right system is planned with suitable products and quantities.

Supply & install

Maxikyo supplies the required products and manages the installation process.

Test & handover

After installation, the system is checked to make sure everything is working correctly.

Support & maintain

Maxikyo continues to support customers after the project is completed.

MAXIKYO

when safety matters, we're always on

Support that keeps your systems working.

Security and IT systems need regular checks, updates and maintenance. Maxikyo can support customers after installation through service visits, troubleshooting and maintenance engagement options.

MAXIKYO

when safety matters, we're always on

Maxikyo offers flexible engagement options based on the customer's exact requirement, project size and level of support needed. Customers can choose a one-time supply model when they only need specific products or hardware, or opt for supply + installation when they want the complete setup handled professionally. For larger sites, Maxikyo provides turnkey project solutions, covering CCTV, IT systems and wireless networking from planning to execution. For customers who need continued reliability after installation, AMC and ongoing support options help ensure regular maintenance, troubleshooting and long-term system performance.
